

### DSA|OC Programs/Services for Families and Individuals with Down Syndrome Include:

Please note that this list is updated as new programs and services become available through DSAOC. This list is not all inclusive, but will give you an overview of how DSAOC serves the community.

- **New/Expectant Parent Program:** DSAOC's support begins as early as prenatal diagnosis and continues throughout the life journey of the individual with Down syndrome. Our New Parent Support Coordinator conducts hospital visits and in home visits, and either a selected Parent Mentor or the New Parent Support Coordinator will deliver a beautiful DSAOC "Welcome Baby" basket to the family that has beautiful baby gifts, as well as important resources in the form of a pamphlet, books and a DVD about a variety of topics relating to Down syndrome. We also have support groups and an annual New Parent Luncheon held in the Spring. The **National Charity League-Pacific Coast Chapter** is a generous sponsor of our Welcome Baby Basket program.
- **Parent Mentor Program:** At the request of an expectant parent or new parent, **DSA|OC** connects them with a Parent Mentor (a parent who has a child with Down syndrome that has gone through a special **DSA|OC** parent mentor training program.) **DSA|OC** currently has approximately 30 trained mentors living throughout Orange County and surrounding areas available to expectant and new parents.
- **Parent Education Programs (PEP):** Includes parent education seminars, workshops, healthcare seminars and networking opportunities. Each year, **DSA|OC** provides an average of 30 parent education seminars and 50 parent networking and support groups. In total, these seminars and networking/support groups serve hundreds of parents, grandparents and caregivers each year.
- **Prenatal Diagnosis Support:** Due to the recent launch of a new prenatal test that specifically recognizes a fetus with Down syndrome, besides offering our prenatal support services, DSAOC put together a **Prenatal Diagnosis Committee** to create an informational packet for families who receive this prenatal diagnosis. This committee will also stay updated on state and nationwide legislature and resources so we can provide up-to-date and accurate information to hospitals, medical professionals and families.
- **Support Groups:**
